It's not our role to limit young minds and place them on an established path, but to knock down the barriers and let them forge their own. While coding and 21st century skills are necessary, our program also goes beyond code by incorporating robotics and technology with collaborative STEAM activities, nurturing students' imaginations in ways no other education program can.

Our cross-platform apps are approachable for all skill levels and allow users to progress with ease, enabling us to reach as many minds as possible and provide ongoing challenges. This is Sphero Edu.
